

Clean air and no diesel smells for Feyenoord Football Club

Introduction

The pitch at De Kuip Stadium, Rotterdam, home of Dutch professional football club Feyenoord, is meticulously maintained by Grass Master, Erwin Bletman and his team.

The challenge

A few years ago, all the grounds maintenance equipment and lawn mowers were running on diesel. Much of Erwin's team's time is spent walking behind the diesel mowers surrounded by the smell of diesel.

The solution

After seeing – and smelling - the cleaner burning, alternative to diesel the club made the switch immediately to enable cleaner air for the grounds maintenance team and visitors to the stadium. The club are still using Shell GTL Fuel to fuel their on pitch success!

About Certas Energy

As the UK's largest independent distributor of fuel and lubricants, we operate a national network that delivers a competitive, reliable local service.

Shell GTL Fuel is a gas-derived liquid fuel. It burns cleaner than conventional diesel so produces fewer local emissions and less visible black smoke. This is because it contains virtually no sulphur or aromatic compounds and has a high cetane number. Shell GTL Fuel can be used in existing vehicles and other equipment with heavy duty diesel engines without modification and has been available in the UK since 2016.

For more information on how Certas Energy can support your journey towards lower emissions through alternative fuels such as Shell GTL Fuel contact us on.
