

# Certas Energy Statement Russia – Government Sanctions

**Issue date: Friday 04 March 2022 - 09.30am**

Certas Energy is the largest distributor of liquid fuels in the UK and as such we have a robust national supply chain with contractual supply arrangements with virtually all of the major refineries and importers across the UK. These suppliers are already working in accordance with any sanctions the UK government deploys.

Inevitably this will see some disruption to normal operations. We and indeed the whole industry are working to ensure this is minimised. However, customers can be reassured that we have a robust mechanism in place which enables us to prioritise deliveries appropriately in the event of any such disruption.

Please contact your Account Manager if you have any further queries.
